3. Skills and learning outcomes *

3.1. Skills to be learned

CB06 - Poseer y comprender conocimientos que aporten una base u oportunidad de ser originales en el desarrollo y/o aplicación de ideas, a menudo en un contexto de investigación

CB10 - Que los estudiantes posean las habilidades de aprendizaje que les permitan continuar estudiando de un modo que habrá de ser en gran medida autodirigido o autónomo.

CG-MIB04 - Utilizar las tecnologías de la información y la comunicación para la búsqueda de información, datos bibliográficos y adquisición de nuevo conocimiento para la formación permanente y el trabajo autónomo

CG-MIB05 - Utilizar técnicas de expresión oral y escrita para comunicar trabajos y conclusiones a comunidades de iguales o divulgación científica, elaboración de artículos, manuales de estilo y herramientas de edición para fomentar la capacidad de comunicación y diseminación de resultados

3.2. Learning outcomes

RA119 - Apply the concept of Ambient Intelligence to the domain of health and social inclusion

RA117 - Design services based on the Ambient Intelligence paradigm

RA118 - Perform individual and team work by searching sources of information, critical discussion and present the results in oral and public presentation

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

4. Brief description of the subject and syllabus

4.1. Brief description of the subject

The objective of this subject is to acquire competencies in the field of Ambient Intelligence, through the knowledge of its concept and evolution over time, the technologies and the services that can be offered especially in the areas of health and independent living.

4.2. Syllabus

1. Introduction
2. AMI architectures and technologies
 - 2.1. Arquitectura del los sistemas AMI
 - 2.2. Modelos de información en sistemas AMI: ontologías y sensores
3. Technologies for Independent Living
 - 3.1. Independent living paradigm
 - 3.2. Active and Assisted Living Services
 - 3.3. Practical examples (Living Lab)
4. Accessibility
 - 4.1. Accessible Open Services
 - 4.2. Services for social inclusion
5. AMI and health

6.1.3. Referred (re-sit) examination

No se ha definido la evaluación extraordinaria.

6.2. Assessment criteria

Students will be evaluated, by default, through continuous assessment. The grades of the subject for these students will be as follows:

50% continuous evaluation of the subject and practical case + 50% of the evaluation of the final exam.

In compliance with the Evaluation Regulations of the Universidad Politecnica de Madrid, students who wish to do so will be evaluated through a single final exam as long as they communicate it before 31st of March 2021 through the link that will be made available to that effect through Moodle. This option supposes the resignation to the continuous evaluation. In this case, the final grade will be 100% final exam.

For ALL the students that have to go to the EXTRAORDINARY exam of the subject, the final grade will be obtained as:

100% final exam.

7. Teaching resources

7.1. Teaching resources for the subject

Name	Type	Notes
Sitio Moodle de la asignatura	Web resource	
Affective Computing. Rosalind W. Picard. MIT Press, 2000	Bibliography

8. Other information

8.1. Other information about the subject

The subject is directly related to SDG 3, promoting healthy life and wellbeing of the citizens. Moreover, it promotes sustained, inclusive and sustainable economic growth through different approaches explained to the students, contributing to SDG 8. Being the subject of a technical nature, the practical projects will include sections to contribute to the SDGs in particular to number 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation. The course will also help sub-objectives 4.3: Ensure that students access quality technical, professional and superior training; 4.4: Significantly increase the number of people with the professional and technical skills necessary to access employment and entrepreneurship; and 4.7: Ensure that all students acquire the theoretical and practical knowledge necessary to promote sustainable development.
