6.2. Assessment criteria

In written work presentations it is assessed the following: medical problem to be solved, background; enabling technologies, several solutions comparison; targeted needs; applications cases, conclusion; used references; clarity of the presentation, summary quality; shown understanding of the field.

In written exams: there are mostly small questions for brief, concise answers, some numerical questions.

Students will be qualified through continuous evaluation by default. According to the Normativa de Evaluación del Aprendizaje de la Universidad Politécnica de Madrid, students willing to renounce to continuous evaluation must communicate it using a written solicitude addressed to the coordinator by means of the REGISTRO (in the administrative department) between the second and the fourth (inclusive) weeks of the course.

Evaluation will assess if students have acquired all the competences of the subject. Thus, evaluation through final assessment will be carried out considering all the evaluation techniques used in continuous evaluation (EX, ET, TG, etc.), and will be celebrated in the exam period approved by Junta de Escuela for the current academic semester and year. Evaluation activities that assess learning outcomes that cannot be evaluated through a single exam can be carried out along the semester.

Extraordinary examination will be carried out exclusively by the final examination method.

8. Other information

8.1. Other information about the subject

The course is related to the Sustainable Development Goals of the 2030 agenda as follows:

SDG3 on health and well-being for everyone at all ages. Although as a technical subject it does not directly influence any of the sub-objectives, indirectly, training in instruments that help diagnose diseases contributes to improving health.

SDG4 on quality education, in particular 4.4, giving quality training to increase the number of people who acquire professional skills to access quality jobs.

The course can be followed either face to face or on line depending on the need derived from the pandemic.
